QA Testing
Test Case Design Methods
Assignment 1

User Interface Based Test Case Design

Study the user interface of MS Word software. Study the File, Edit, Insert, Format and Table Menu options and associated user interface flow paths.

Develop test case design for the following usage scenarios:

1.Create a new text file, while doing so, use multiple insert options and format menu options.
2.Edit an existing text file, while doing so use multiple edit, insert and format menu options.
3.Create a new text file containing a table, while doing so use multiple insert and format menu options.

Develop test cases to test the word processor at boundary values. For each usage scenario given above develop at least 3-5 tests.
